

A complete offer by Poujoulat

100% Manufacture by Poujoulat

All diameters, chimneys and flue types are produced by Poujoulat

with 8 factories (80 000m²) in Europe producing from 60mm to 5 metres in diameter, pre-fabricated chimneys and large free-standing steel chimneys.

Poujoulat has, within its manufactured range, a chimney solution to meet your requirements.

Initial design & selection

Products of the highest quality with state of the art tooling and machines.

- Specification & Selection
- Estimating
- Thermal design flue sizing
- Structure design and calculations
- Site surveys
- CAD drawings

Air quality & sustainability

An environmental management turned towards renewable energies and energy efficiency.

- Chimney Height to CAAM (Clean Air Act Memorandum)
- Dispersion Modeling to ADMS4
- Certified ISO 14001:2004

Research & development

Developing new products to suit emerging technology

The CERIC (Research and Testing Centre for the Chimney and Flue Industry) is a research laboratory specifically in the field of flue gas evacuation. CERIC works closely with the POUJOLAT group in the fields of quality control and the continued product Research and Development programme.

A turnkey package from design to installation

Design

Our engineers develop the product and assist you with its project application.

Our Technical Team will provide you a full thermal and structural design and produce working drawings, all fully compliant with British and European Standards.

We provide as well, Clean Air Act calculation plus ADMS4 dispersion modelling.

Manufacture

Products of the highest quality, with state of the art tooling and machines.

120,000 m² of Group facilities, a skilled work force, state of the art tooling, and continual quality assessment, innovative and quality fabrication is our norm with a stock holding second to none.

Installation

Complete Turnkey project managed, on time, safe & optimal solutions.

Our highly qualified trained installers arrive on time, fully equipped and prepared and carry out a competent quality installation to your satisfaction, whilst complying with the Health & Safety requirements of today.

Maintenance

Full service after care provided for the entire life cycle.

Pro-active maintenance guarantees the optimum life expectancy plus maximises the efficiency. With our maintenance personnel, a pro-active quality service is the standard.
